

Description

This is a 3D model of the chapels of the castle of La Roche-Guyon, France. The chapels are constructed in the chalky cliff overlooking the Seine River. The walls are covered with stones and plaster to give the chapels a normal, non-troglodytic look.

Construction of the chapels ranged from the XIIth century through the XIXth. The chapels are organized from west to east beginning with the the crypt, the chapel Notre-Dame-des-Neiges, the King's chapel, the Calvary's chapel and the sacristy.
