

Description

This model shows in the center the Altar of Santa Librada located in the Sigüenza Cathedral (Guadalajara, Spain). It is one of the finest examples of Plateresque art (16th century) created to contain the relics of Santa Librada. The Altar contains a beautiful altarpiece showing scenes from the life of Saint Librada, magnificent works of art painted by Juan Soreda between 1526 and 1528. The model shows also the impressive Mausoleum of Fadrique de Portugal, bishop of Sigüenza (1512-1532).

3D model made in Reality Capture using 6604 camera and 22 scan positions. Additional processing completed in Geomagic Wrap and Zbrush.

This work is part of the collaboration agreement signed in 2020 between the Junta de Comunidades de Castilla-La Mancha and Global Digital Heritage. We want to thank the Bishopric of Sigüenza-Guadalajara and the cathedral chapter, especially D. Jesús de las Heras, D. Miguel Ángel Ortega and D. Julián García, for the facilities and for the interest they have shown in the project.
