
Description

The T20 Tomb of the al Khudaira archaeological site (Sharjah, UAE) was excavated in February 2020 by the Spanish archaeological mission of the Universidad Autónoma de Madrid, with funding from the Sharjah Archaeology Authority. A circular funerary building built of dry-laid masonry, 4.30 m in diameter, with a single elliptical funeral chamber and no gallery or entrance door was discovered. The surrounding ceramic fragments suggest that it was used in the 2nd millennium BC. Project ID Al Khudaira 06 Final Drone.

2060 Photos from a Phantom P4 Pro, V2. Processed in Reality Capture.

Specifications

Country: United Arab Emirates
