

Description

Stamped jar fragment from Calatrava la Vieja, Castilla-La Mancha, Spain. Islamic almohad period (1195-1212 CE). This artifact was found in the 2009 excavations in the south-east sector of the medina, next to the western wall of the alcázar. The jar ("yabiya" in arabic) was the most common container for the storage and transport of liquids and solids during the andalusian period in the Iberian Peninsula. To its utilitarian function, it added a decorative value, particularly since the 12th century, when this kind of pieces were profusely decorated with printed stamps with epigraphic, geometric or plant motifs. Catalog No. CV 09 26 889 34. From 147 photos processsed and modeled in Reality Capture.

Rosselló Bordoy, G. (2002): El ajuar de las casas andalusíes. Málaga.
