

Description

Model exhibited in the Interpretation Center of the Carranque Archaeological Park (Toledo, Spain). It is a model of the residential part of the Roman villa of Carranque, located in the municipality of Carranque. In the model, it is possible to see the large number of mosaics that have been discovered. The owner's name of the villa is written on one of the mosaics: Materno. The Roman villa origin seems to be sometime between the 1st century AD and the beginning of the 3rd century AD. However, most of the elements preserved in the residential part of the villa date back to the 4th century AD. Currently the Roman villa is part of the Carranque Archaeological Park, being one of the most visited archaeological sites in Castilla-La Mancha.

3D model was made in Reality Capture software from 485 images with additional processing in Geomagic and InstantMeshes.

Specifications
