

Description

Inscription in Arabic located in the Archaeological Park of Carranque (Toledo, Spain). The inscription was made by reusing a large Roman marble column that was carved from a single block of stone. Everything seems to indicate that the marble to carve the column comes from the Eastern Mediterranean. The inscription could be referring to the owner of the column in Islamic times.

3D model made using 52 images in Reality Capture with additional processing in Geomagic Wrap and InstantMeshes.

Specifications
